

Bike & Bus

 **Mountain Line**

All fixed-route Mountain Line buses have bike racks that hold up to three bicycles. The racks are easy to use and it only takes a few seconds to load your bike!

As the bus approaches, have your bike ready to load. For safety reasons, the driver can't get off the bus to help you, but they can tell you how to use the rack.

Step-By-Step Instructions

Loading Your Bike

1. Once the bus has come to a complete stop, signal to the driver that you'll be loading your bike. Remove any loose items that may fall off during the ride like water bottles or loose bike locks.
2. Approach the bus from the curbside. If the bike rack is not already down, squeeze the handle up to release the latch, then lower down the rack.
3. Lift your bike onto the rack, fitting the wheels into the wheel slots. Each slot is clearly labeled for the front wheel. All bike positions are independent of each other, making it easy to load or unload any bike, even if other bikes are loaded.
4. Raise the support arm over the front tire. The support arm needs to be raised so that the hook rests beyond the highest point of the tire closest to the frame. The hooks are designed to fit over fenders.

Unloading Your Bike

1. Don't forget to take your bike with you when you get off! For safety reasons, **it is very important to tell your driver you need to unload your bike when you approach your stop.**
2. Raise the support arm off the tire. Move the support arm down, out of your way.
3. Lift your bike out of the rack.
4. Fold up the bike rack if there are no other bikes in the rack.
